## TERMS

All bills are payable in sixty days net, or a discount of two per cent. for cash in ten days from date of invoice.

Accounts overdue are subject to a sight draft.

All claims for errors in shipments or for shortages must be made within five days after receipt of goods.

Goods are sold f. o. b. cars at shipping point unless freight allowance is quoted.

All agreements are contingent upon strikes, accidents or other causes beyond our control.

Quotations are made for immediate acceptance.

We will replace free of charge any goods made by us that are found defective on account of material or workmanship.

Do not return any goods to us without first writing us for shipping instructions.

Prices in this catalogue subject to change without notice.

ILLUSTRATION NO. 2.

Particular attention is called to the special feature of this ladder, in the small amount of room this ladder occupies when not in service, as shown by small cut in background. The construction of this ladder is such that no unnecessary strain comes on shelves or fixtures.

For description of ladder see page 4.

For prices see page 5.

ILLUSTRATION NO. 1.

This style of ladder is usually made of either Hard Pine or Quartered Oak, and the iron work finished with Aluminum Bronze.

Prices for other kinds of wood, or finish for fixtures, quoted on application.

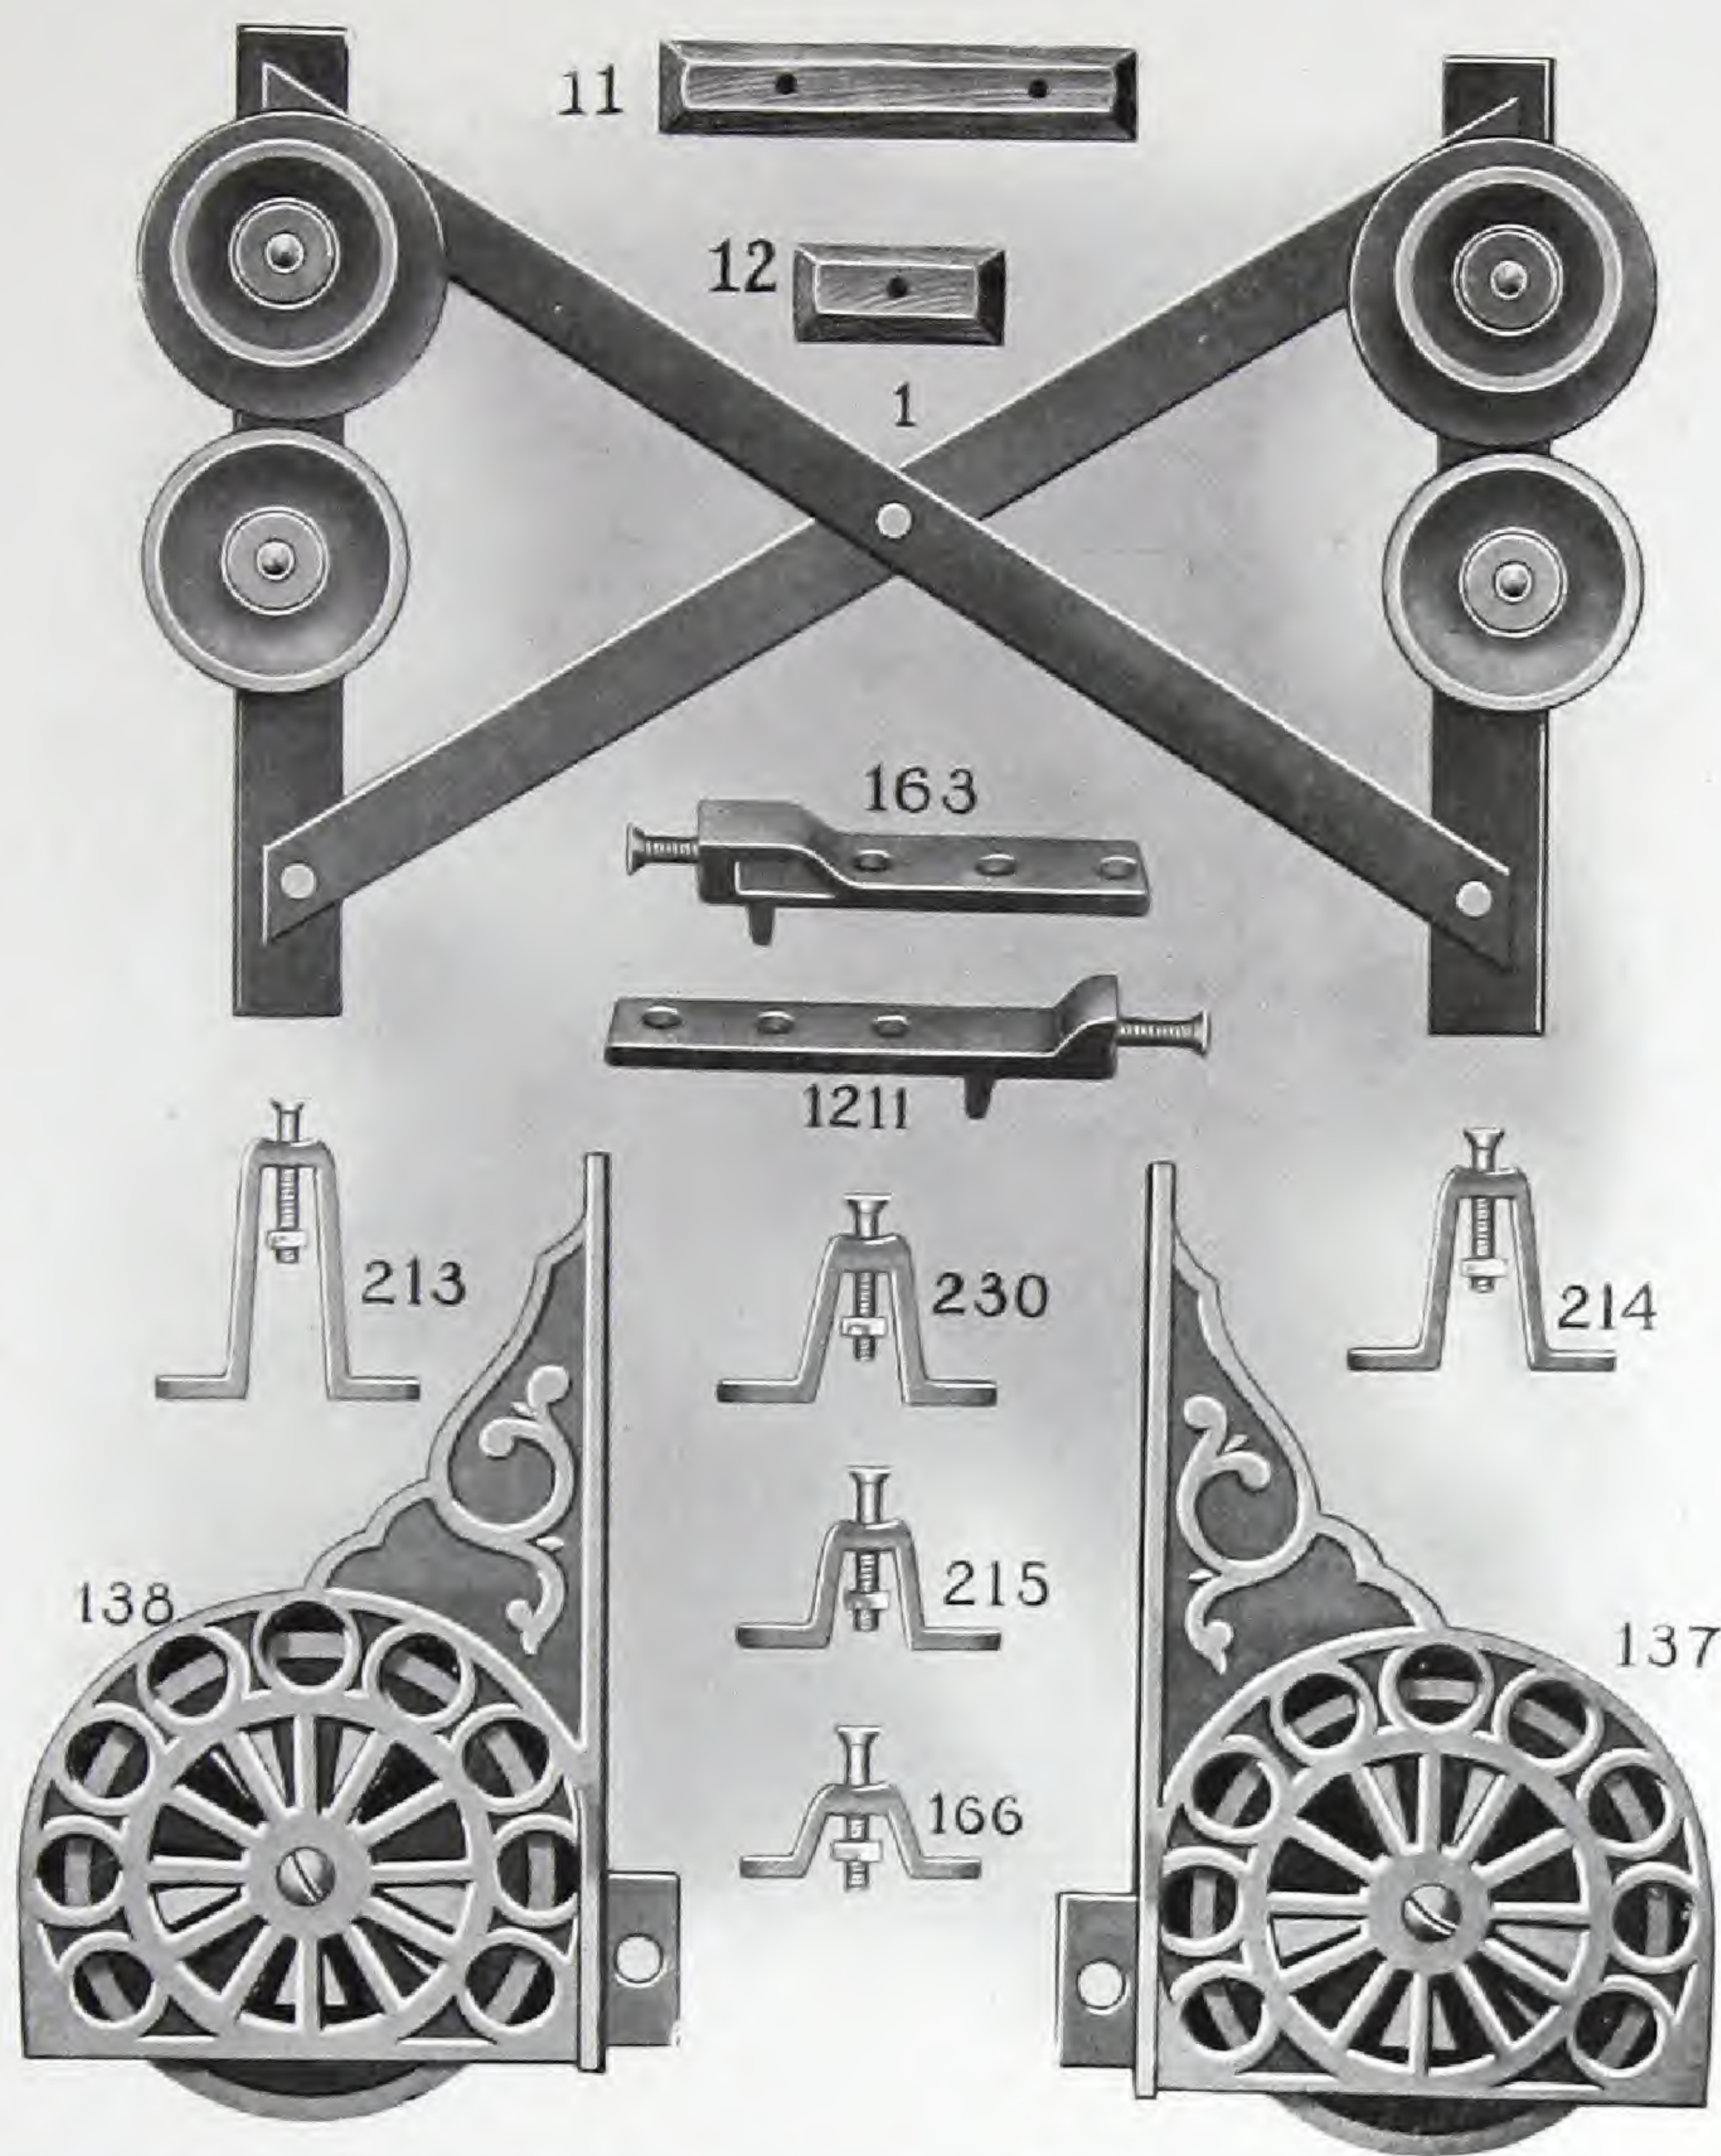

Ladders are sixteen inches wide outside. Sides 3 inches wide and treads  $4\frac{1}{2}$  inches wide.

Carriage to allow Nos. 1, 2, 3 and 5 ladders to operate around curved track can be furnished at an additional list price of \$10.00.

See opposite page for prices.

ILLUSTRATION NO. 3.

The track for this ladder is shown attached to top of cornice with No. 163 or No. 1211 track bracket, illustrated on page 5. No track is required on floor for this style of ladder.

For general description of ladder see page 4.

Ladders 1, 2 or 3 furnished with either rubber tired or iron faced wheels.

Add \$2.00 to list prices given on page 5 for bent ladders—for either Pine or Oak.

COBURN TROLLEY TRACK M'FG. CO.

ILLUSTRATION NO. 5.

This type of ladder requires a one-half round iron track on counter ledge to keep the ladder in position, with grooved iron wheels to run on same.

PRICES OF NO. 5 LADDER, TRACK AND FIXTURES.

	Last Price.
Hard Pine bent Ladders, complete . . . . .	\$20.00
Oak bent Ladders, complete . . . . .	24.00
Wood track with brackets, per foot . . . . .	.30
Half round iron track for base, shelf or floor, per foot . . . . .	.10

ILLUSTRATION NO. 6.

This style of ladder is for use when it is desired to eliminate the track on the ledge, and the condition of the floor will not permit the ladder to operate freely.

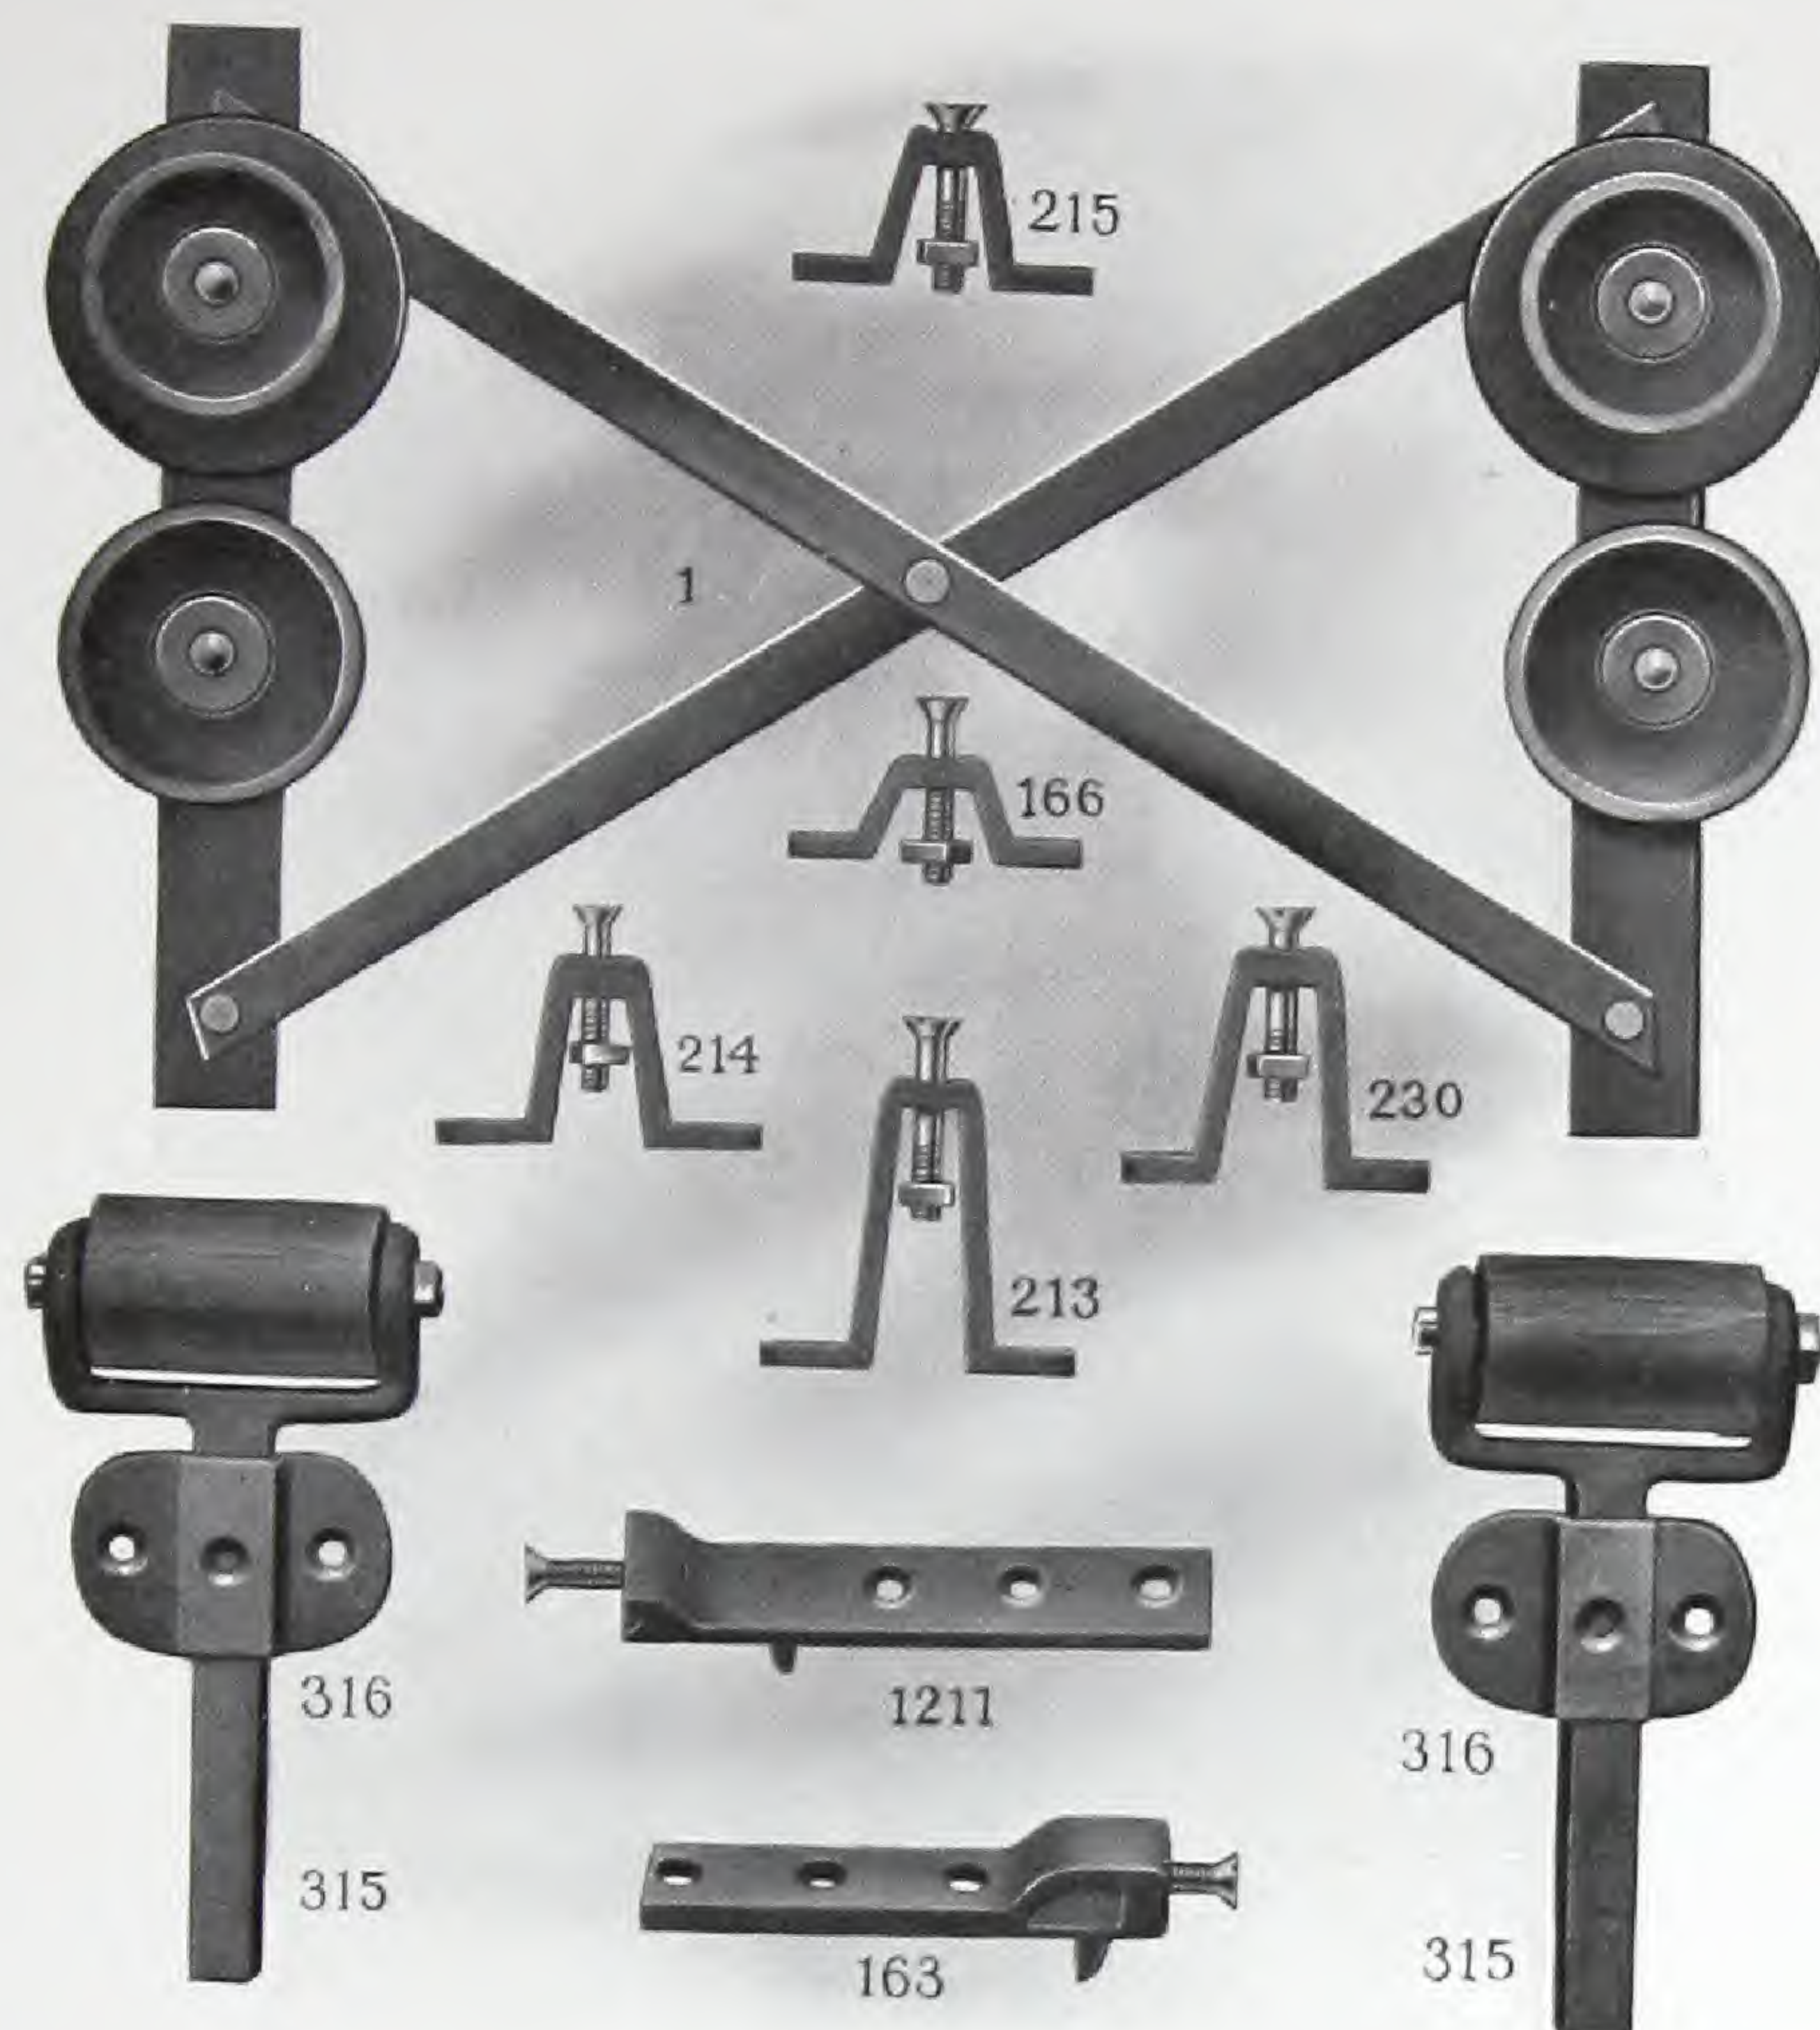

It is necessary to use tubular iron track, which must be securely fastened, preferably to the uprights, to secure sufficient strength.

Plain hardwood rolls, or rubber covered rolls furnished as desired.

Prices on opposite page.

COBURN TROLLEY TRACK M'FG. CO.

PRICES OF NO. 6 LADDER, TRACK AND FIXTURES.

	List Price.
Hard Pine bent Ladder, wood fender rolls.....	\$18.00

No. 315 Fender Rolls for Ladder, complete, per pair.....	3.00
Plain wood rolls only, per pair.....	1.00
Rubber covered rolls only, per pair.....	2.00

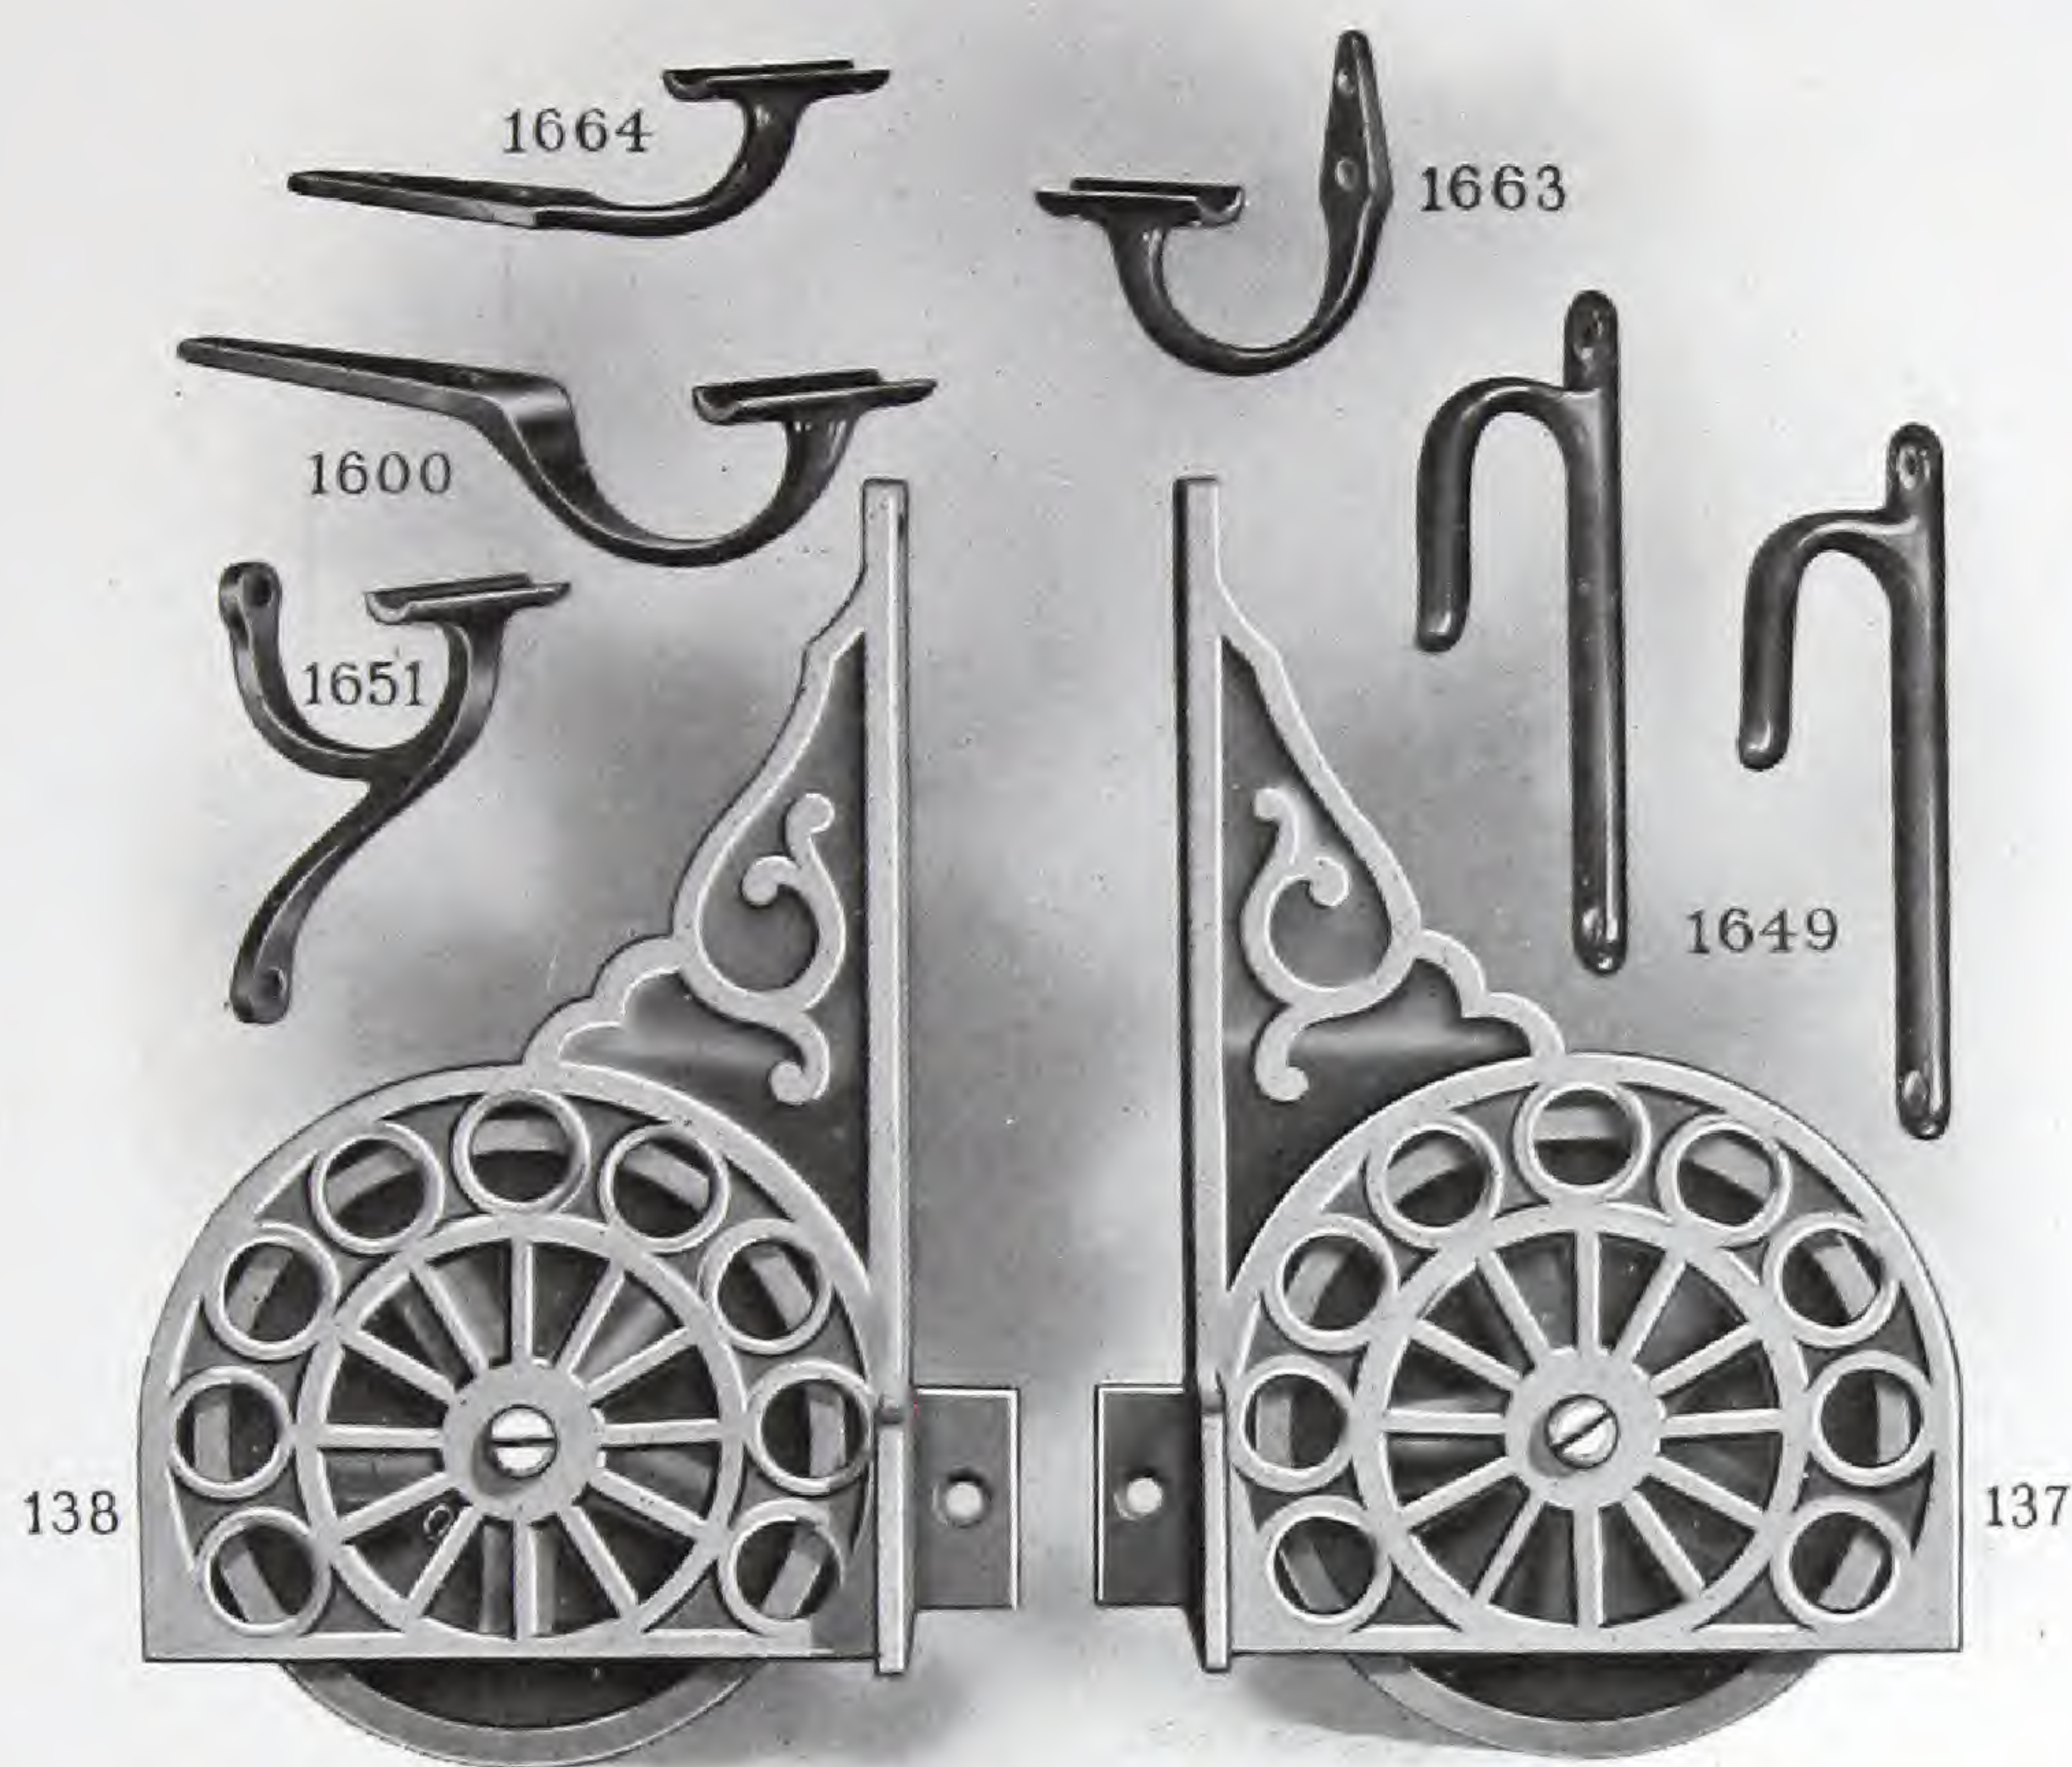

ILLUSTRATION NO. 8.

The construction of this ladder, which allows it to be easily removed from the track, makes it particularly adaptable for use in vaults, file-rooms, linen closets and small spaces where the installation of more than one ladder would be objectionable for any reason. By having separate tracks, all four sides of a room can be made accessible with only one ladder.

For prices see opposite page.

PRICES OF NO. 8 LADDER, TRACK AND FIXTURES.

	List Price.
Hard Pine bent Ladder.....	\$12.00
Oak bent Ladder.....	16.00
For straight Ladders, deduct \$2.00 from above list.

Half round Iron track, for base, shelf or floor, per foot.....	.10
No. 1651 Cornice bracket for pole track.....	.20
No. 1663 and 1651 Regular brackets for uprights for pole track....	.20
No. 1600 Shelf bracket for pole track.....	.20
No. 1649 Hooks for top of ladder, per pair.....	2.00
Nos. 138 and 137 Right and Left Hand bottom rolls, complete with grooved iron rolls.....	4.00

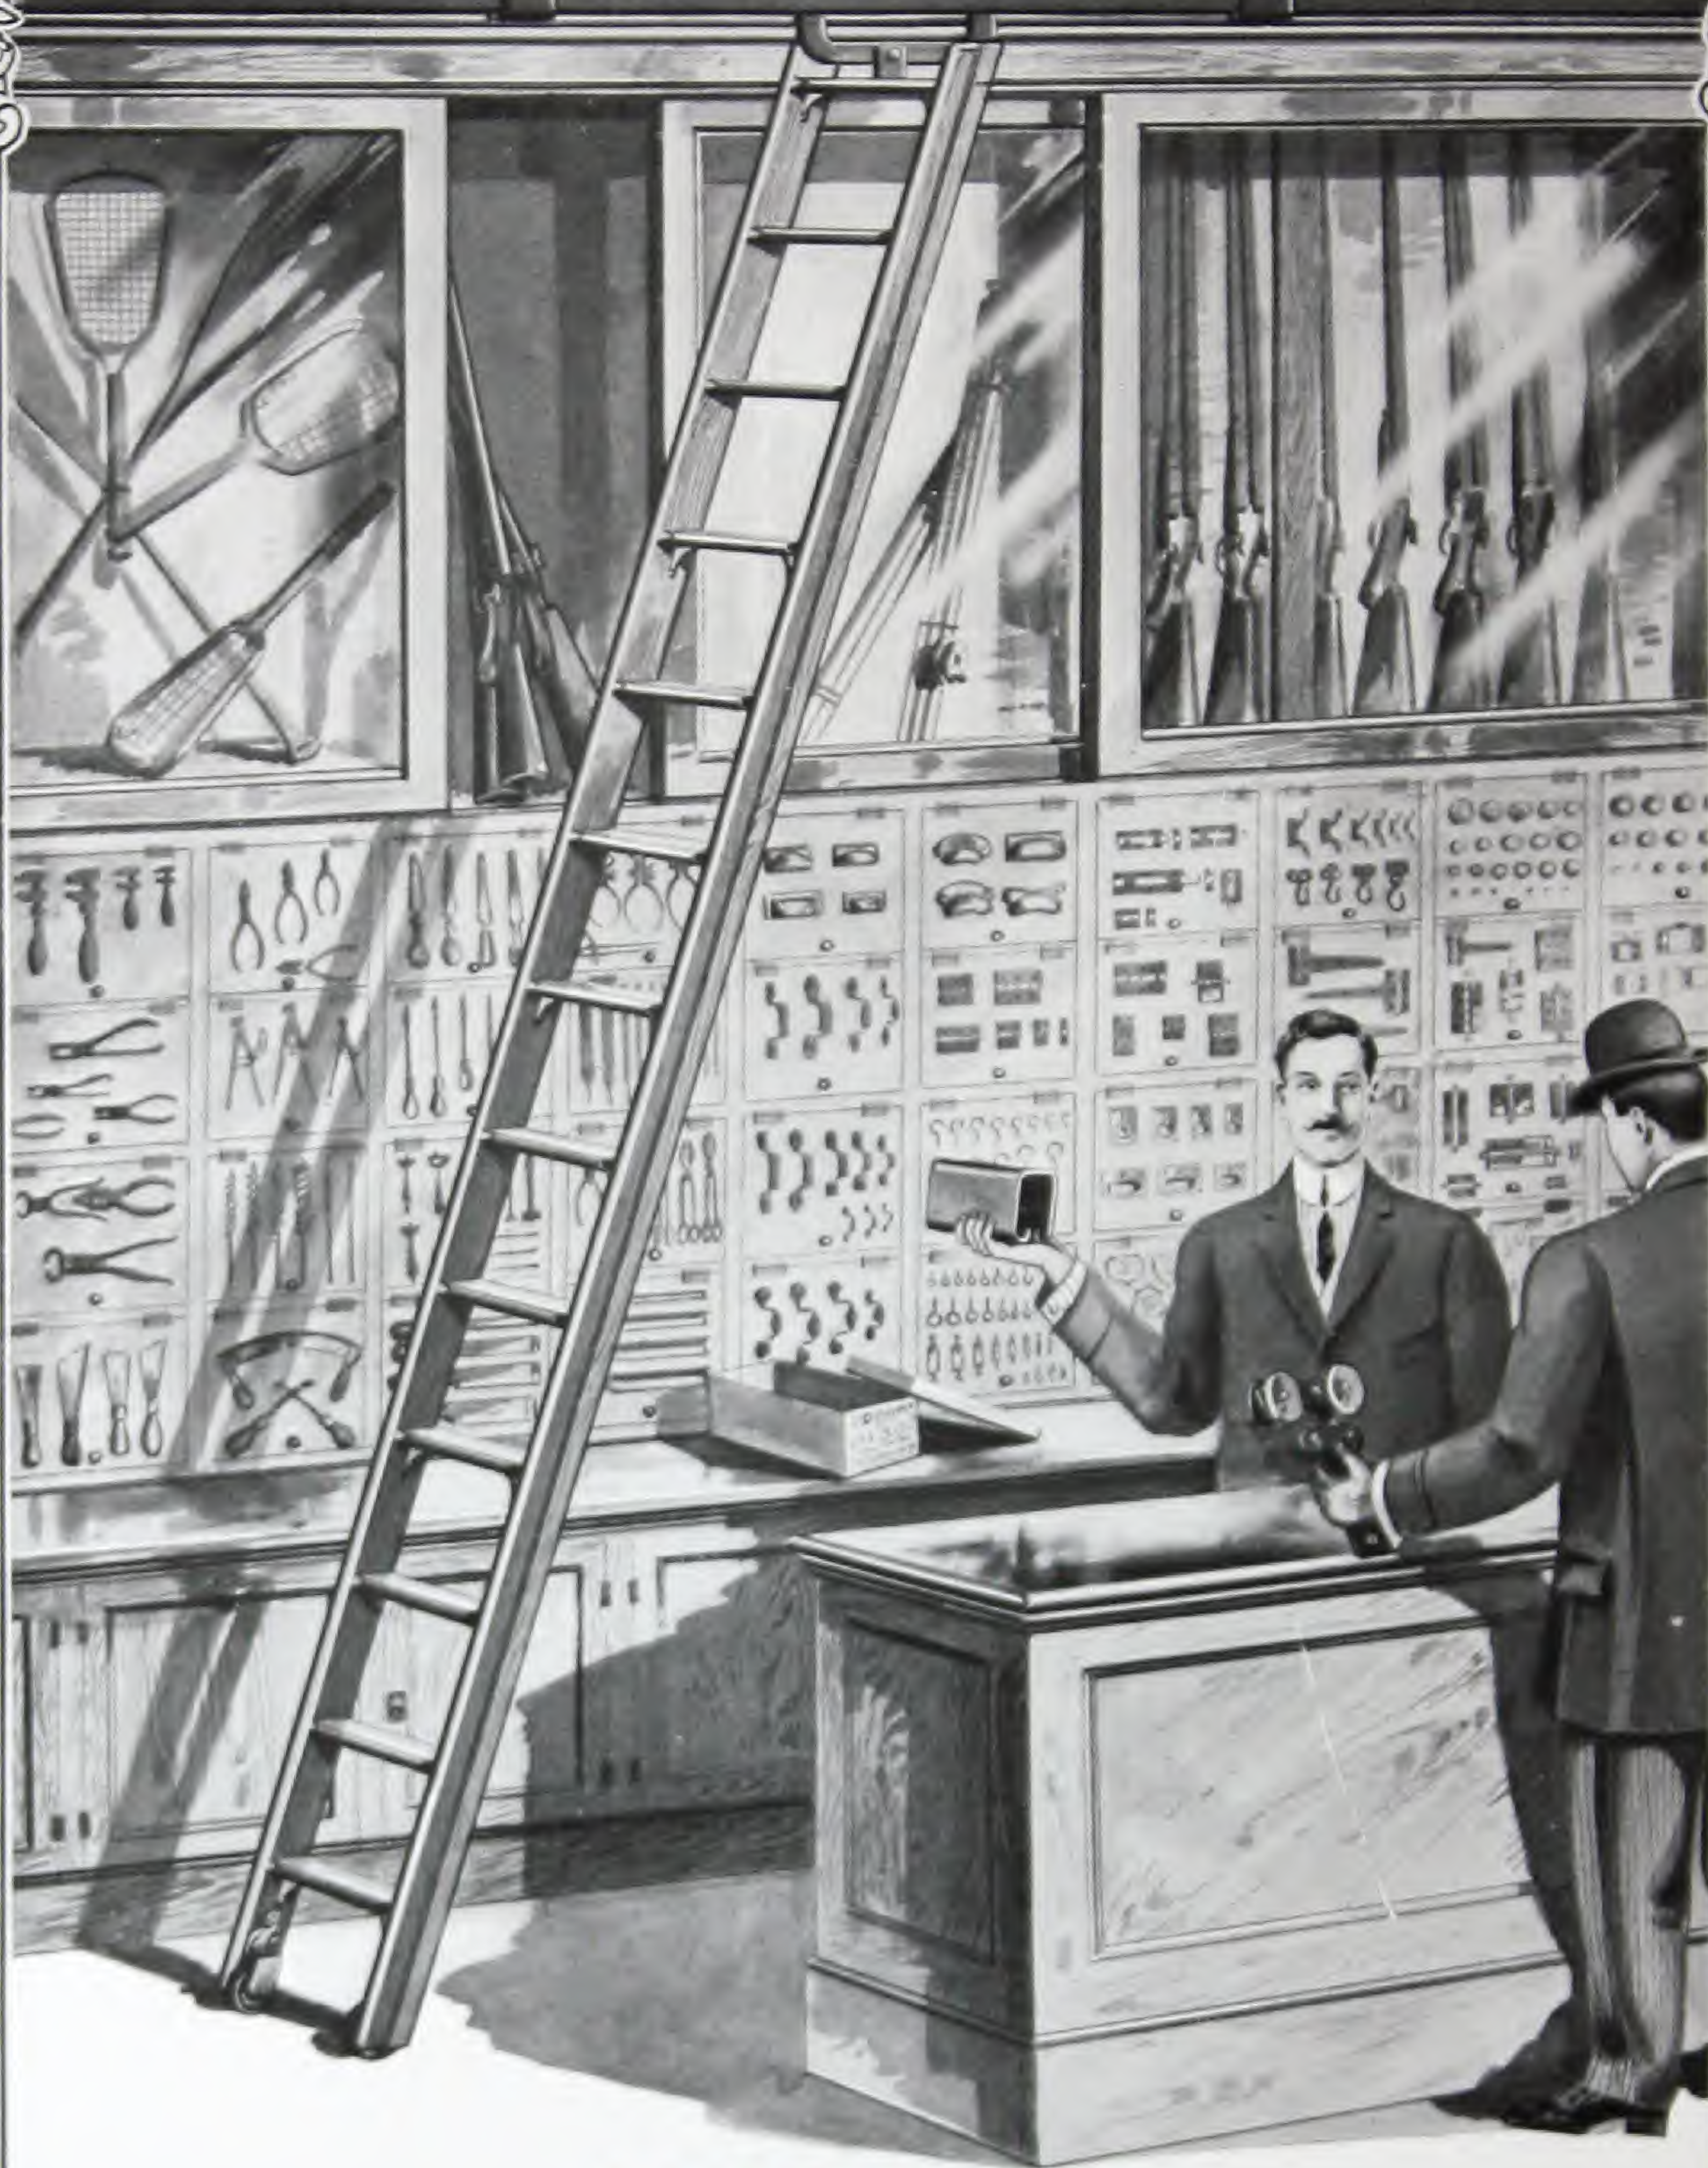

ILLUSTRATION NO. 9.

For hardware and other stores where heavy merchandise is to be handled, this ladder is recommended.

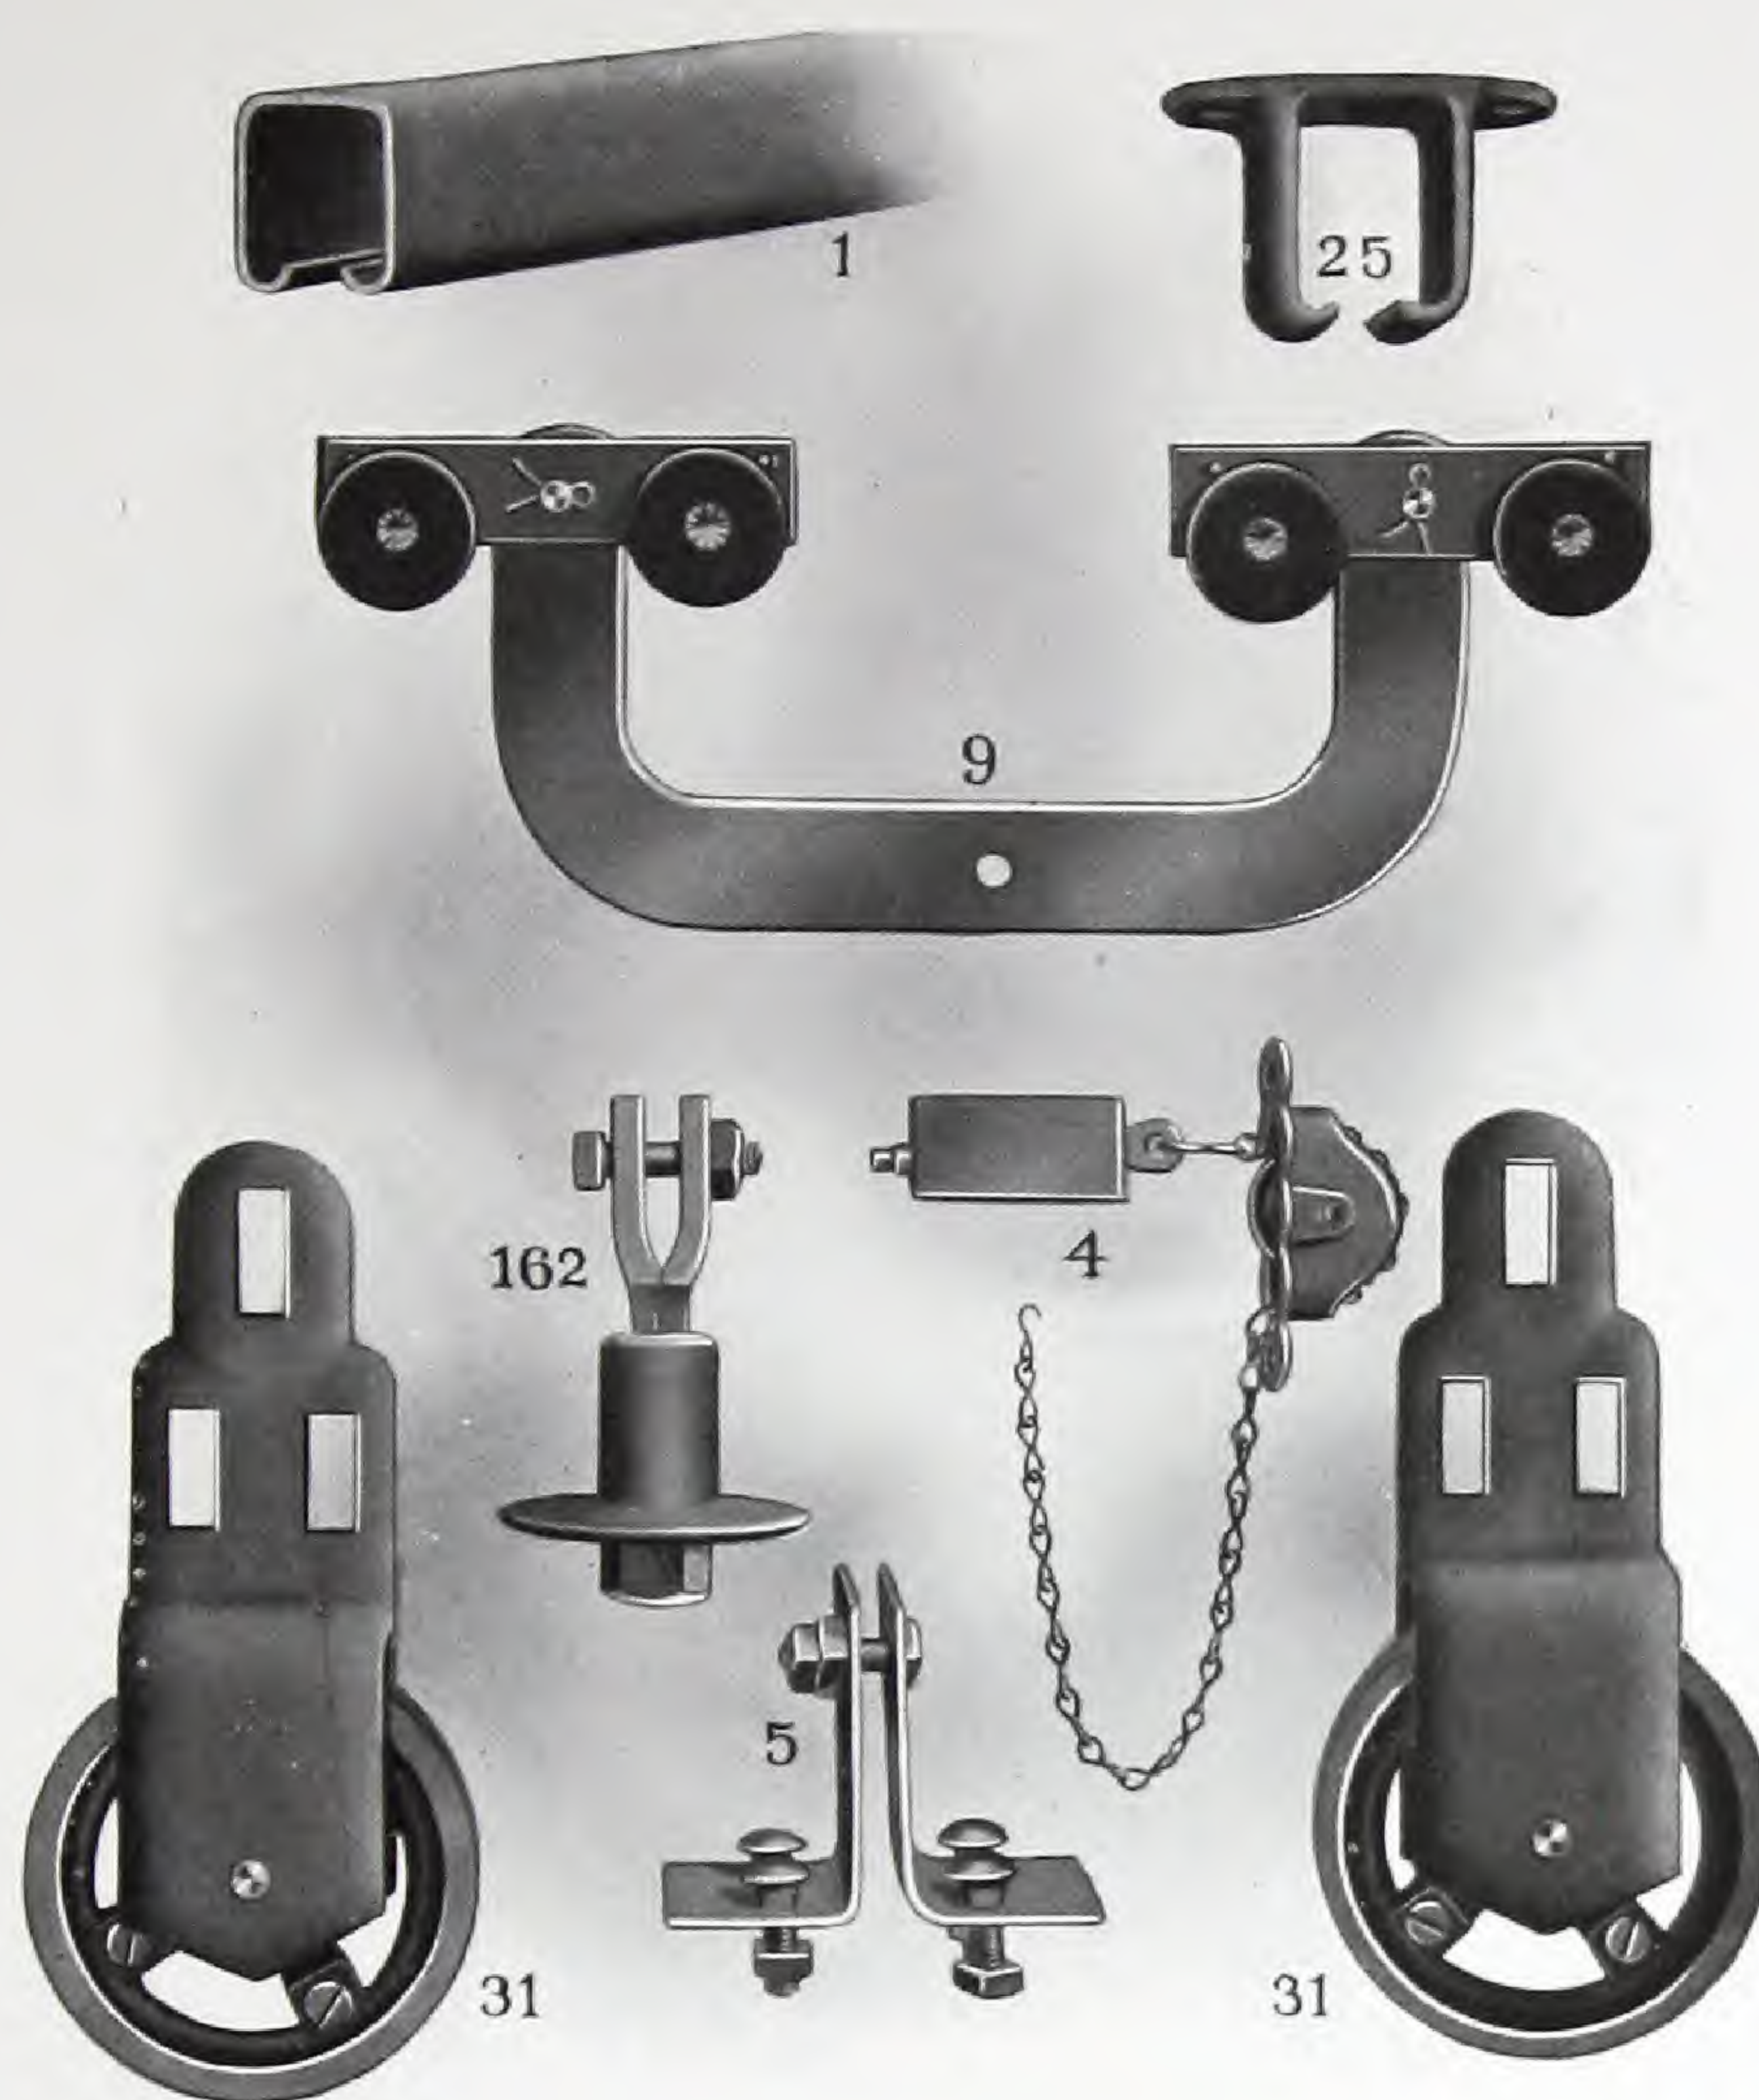

This style of ladder is usually made of Hard Pine or Oak and is  $13\frac{5}{8}$ " wide, outside. Ladder fittings finished in Aluminum Bronze. No. 1 track and brackets are used with this ladder—track regularly furnished in 4, 5 and 6-foot lengths—can be furnished any length up to 10 feet—brackets, however, should be spaced not over 6 feet apart.

For plastered ceilings, ceiling strips should be used.

For prices see opposite page.

# COBURN TROLLEY TRACK M'FG. CO.

## PRICES OF NO. 9 LADDER, TRACK AND FIXTURES.

	List Price.
Hard Pine Ladder, complete.....	\$20.00

Rubber tires only, per pair.....	1.60
Pine ceiling strips, per foot.....	.10
Oak ceiling strips, per foot.....	.20

SUGGESTIONS AND INSTRUCTIONS.

NOTE 1. Select the ladder best suited to your shelving and accurately fill in the measurements on the order blanks on opposite page of catalogue, for the style of ladder wanted.

NOTE 2. We advise locating the tracks for ladders Nos. 1-5-6-8 as near as possible to a point 3 or 3½ feet below the highest point at which the goods will be stored. Construction of shelving will, however, have to be considered in locating the track.

NOTE 3. If you prefer style of ladders Nos. 1 to 8 inclusive, keep in mind the fact that any ladder having the bottom rolls resting on the floor is preferable to one supported by a track on the shelving or on the base shelf (ledge). A track on the floor is undesirable, but not so much as a track on the ledge, which must be kept clear of goods in order that the ladder may be operated.

NOTE 4. We desire to have 12 inches of clear space above the track for the top of ladders Nos. 1-5-6-8. This should be considered in locating the track. This space can be reduced to 6 inches if absolutely necessary, but it detracts from the looks of the ladder to make it so.

NOTE 5. When the distance from the counter ledge to where the track is located is 6 feet or more, and the counter ledge does not exceed 16 inches in width we advise using straight ladders, they being easier of ascent and descent and take up but very little more floor space.

NOTE 6. If you order No. 6 style ladder **we must have the exact distance from center to center of shelf uprights, also state width of same**, if the track brackets are to be attached to uprights.

NOTE 7. Should your shelving differ from those illustrated by us send us a sketch with all measurements defined and we will advise you as to the best possible application of track, etc.

NOTE 8. Be sure that measurements are accurate and correct in all cases so that we can send the track properly bored for the brackets.

NOTE 9. Top shelves or side shelves we will furnish free of charge whenever desired. In ordering ladders Nos. 9 or 10 advise if ceiling strips are wanted, otherwise we do not send same, as we assume that your ceiling is strong enough to attach the ladder to properly.

NOTE 10. Ladders are approximately one foot longer than distance from floor to track shelf, **or floor to ceiling**.
